CHAIRMAN'S STATEMENT

集团不仅希望为其股东创造价值，也希望将其业务所创造的经济价值公平地分配给其他利益相关者，即客户、供应商和员工。

The Group aspires not only to create value for its shareholders but also to distribute fairly the economic values created from its businesses to its other stakeholders, namely the customers, suppliers, and employees.

LEE BOON LENG
Independent Non-Executive Chairman

Dear Shareholders,

The impact of COVID-19 has been long-lasting on the global economy and the technology that increasingly enables it to function more digitally. The pandemic has accelerated the need to digitize and automate as much of the economy as possible and this trend is set to continue. This is further proven by the growing significance of technology in consumers' daily lives since the pandemic breakout, through the use of digital tools and connected devices for remote working, online shopping, online study, healthcare, and others. All these augur well for the semiconductor industry that the Group is in, as increased reliance on digital technology has boosted demand for chips and their related equipment. New markets have also emerged as the levels of technology innovation rise.

PERFORMANCE REVIEW

Like many industries, the Group's businesses were impacted and disrupted in the year under review due to the prolonged pandemic which brings with it challenges such as continuous restrictions, health concerns, and border controls. Despite these setbacks, for the year ended 31 December 2021, the Group achieved a remarkable revenue performance of RM375.5 million as compared to the previous year's performance of RM229.0 million, showing an increase of 64.0% year on year. Both the core business units of Semiconductor Equipment Business Unit ("SEBU") and Semiconductor Material Business Unit ("SMBU") performed admirably.

The Group's revenue for the year under review continues to be anchored by SEBU which contributed RM250.0 million or 66.6% of the Group's total revenue. As for SMBU which was acquired in April 2021, their contribution to the Group's revenue was also significantly strong, accounting for RM125.4 million or approximately 33.4% of the Group's total revenue.

In line with the strong revenue growth, the Group achieved a strong Profit Before Tax ("PBT") of RM63.5 million, a 14.0% growth over the previous year's PBT of RM55.7 million. PBT margin at 16.9% was, however, lower than the previous year's margin of 24.3%, mainly due to competitive pricing, lower margin nature from the newly acquired SMBU business, and increase in operational expenditure.

On the Profit After Tax ("PAT"), the Group recorded RM60.1 million for the year ended 31 December 2021, an impressive 12.0% growth over the previous year's PAT of RM53.7 million.

CHAIRMAN'S STATEMENT (Cont'd)

CORPORATE DEVELOPMENTS

Two major corporate developments were completed during the year under review.

The first was the completion of the acquisition of Accurus Scientific Co. Ltd, a Taiwan-based company, which had since contributed significantly to the Group's revenue under the Semiconductor Material Business Unit ("SMBU").

Second, the Group completed the private placement exercise which raised a net proceed of RM291.0 million, the proceeds of which were used primarily for business expansion, working capital requirements, and repayment of bank borrowings.

SUSTAINABILITY

The Group remains cognizant of the need to balanced stakeholders' interests as it pursues its business expansion. The Group aspires not only to create value for its shareholders but also to distribute fairly the economic values created from its businesses to its other stakeholders, namely the customers, suppliers, and employees. To this end, the Group strives to remain a customer-oriented company, an employer of choice, and a preferred business partner for its suppliers.

PROSPECTS

The Board remains optimistic of the Group's business prospects given the abundant long-term opportunities in the semiconductor industry as a result of technological innovation. This is bolstered by the fact that the Group has also been able to establish itself as a total technological business solution provider despite its short history, with a growing customer base, product diversification, and a proven business model. Furthermore, the Group's forward-looking strategies that are in line with its long-term roadmap and include the continuing pursuit of organic growth, investment in research and development activities, focus on business processes optimization as well as the pursuit of growth through merger and acquisition, will put the Group in a position to capitalise on any market opportunities that arise in future, further enhancing its competitive edge and market positioning.

DIVIDEND

The Board of Directors is pleased to advise on the dividend declaration amounting to a total payout ratio of 74.5% of the Group's annual audited profit after tax for the financial year ended 31 December 2021, as follows.

- a. A first single-tier interim dividend of 3.0 sen per ordinary share was declared on 29 October 2021 and paid on 30 November 2021.
- b. A second single-tier interim dividend of 2.0 sen per ordinary share was declared on 21 February 2022 and paid on 22 March 2022.

OH KUANG ENG

Executive Director / Group Chief Executive Officer

OVERVIEW

The year 2021, just like 2020, had been another very challenging year for Malaysia and the global economy as a result of the protracted pandemic. While there was initial optimism that lives and businesses will return to some normalcy as vaccination rates rose and economies reopened, successive variants of virus created new waves of infections, dampening moods and disrupting businesses once more. Movement restrictions, health control standard operating procedures, and border controls, among other things, were reinstated not only in Malaysia but also globally. Businesses faced severe challenges throughout the year as they dealt with these issues.

Against this backdrop, our Group's operations and business, like those of many other industries, was equally affected during the year. While we saw strong growth rate registered by certain semiconductor industry players who produce legacy products to meet pandemic-induced strong demands on electronics needed for study and work from home, the growth of smartphones and related wearables, on which the semiconductor industry used to be highly reliant, was somewhat flat in 2021. During this time, advanced packaging, a key component in the semiconductor industry, and which uses, processes and techniques like redistribution layer (“RDL”), also had little growth.

However, our Group's perseverance in sticking to and following our long-term goals had yielded major positive business results, with a 64.0% increase in revenue performance in the year under review. Both core businesses of Semiconductor Equipment Business Unit and Semiconductor Material Business Unit, which are in the semiconductor backend process specialising in advanced packaging, in particular wafer level packaging (“WLP”), along the semiconductor value chain, performed well.

Semiconductor Equipment Business Unit (“SEBU”)

SEBU, with its established products in the market, registered substantial revenue growth fuelled by ongoing strong demand from customers, particularly from China, as a result of work lifestyle technology-influenced changes brought on by the pandemic and the development of 5G enabled mobile devices. China is developing its semiconductor ecosystem towards the target for greater self-sufficiency and technology parity in semiconductors as well as cushioning the sanction impacts arising from trade tensions with United States. With these aims, China is accelerating its investment and development in semiconductors which our Group is partially benefitting from this China's transformation. Our flagship product under SEBU, the Mi Series, contributed significantly to the Group's top-line growth. It is expected that SEBU will continue to be the Group's key revenue contributor in the coming years when all its new products and overseas subsidiaries take off.

CEO'S STATEMENT AND MANAGEMENT DISCUSSION & ANALYSIS (Cont'd)

OVERVIEW (Cont'd)

Semiconductor Material Business Unit ("SMBU")

SMBU's made significant contribution to the Group's revenue for the financial year under review following the completion of Accurus Scientific Co. Ltd.'s ("MiMTW") acquisition and the consolidation of their revenue into the Group's total revenue from April 2021 onward. SMBU benefited from increased customer demands in technology-related industries around the world, as well as the introduction of more consumer electronic devices into the global market as a result of rapid technology development in areas such as 5G, artificial intelligence, big data, IoT, cloud computing, and robotics, among others.

REVIEW OF FINANCIAL PERFORMANCE AND POSITION

We achieved a spectacular revenue performance of RM375.5 million for the financial year ended 31 December 2021 ("FYE 2021"), representing a 64.0% increase over the previous year's revenue performance of RM229.0 million, thanks to a larger customer base and a more diverse product portfolio. SEBU and SMBU both generated strong financial results for the financial year under review.

SEBU provided RM250.0 million to the Group's total revenue in the current financial year, accounting for 66.6% of the Group's total revenue, up 10.3% from the previous year. SMBU's contribution for the current financial year was also significant, at RM125.4 million, or approximately 33.4% of the Group's total revenue, following the conclusion of MiMTW's acquisition and the consolidation of their revenue into the Group's total revenue.

	FYE 2021	FYE 2020	Changes (%)
	RM' 000	RM' 000	
Revenue	375,479	229,004	64.0 %
Operating Profit	64,330	56,092	14.7 %
Profit Before Tax	63,505	55,716	14.0 %
PBT margin (%)	16.9 %	24.3 %	
Tax	3,370	2,003	68.2 %
Profit After Tax	60,135	53,713	12.0 %
PAT margin (%)	16.0%	23.5%	

In line with revenue growth, we reported a good Profit Before Tax ("PBT") of RM63.5 million, up 14.0% from RM55.7 million the previous year. However, the PBT margin for the financial year under review was 16.9%, down from 24.3% in the prior year. The lower PBT margin is expected as the Group pursues a strategy of aggressive expansions and investment to increase market share and revenue, resulting in higher expenses primarily in human resources, research and development ("R&D"), materials, logistics, acquisition expenses, depreciation charges, and other operating expenses for new plants. At the same time, the Group has to deal with the new plants' gestation periods before they start generating profit. The lower margin for the financial year was also largely attributable to a shift in the Group's business unit contribution mix, with SMBU's contribution increasing in importance while its business nature tends to produce a lower margin.

The Group's effective tax rate for the financial year under review was 5.3%, up from 3.6% of the previous year, mainly owing to the temporary differences arising from qualifying building expenditures on plants in Malaysia, operation sites overseas, and also tax expenses incurred by SMBU, primarily MiMTW, which is subject to Taiwan's corporate tax rate of 20.0%. Because of tax incentives received by our subsidiary, Mi Equipment (M) Sdn. Bhd., our Group's effective tax rate remains well below the statutory rate of 24.0%.

The Group's Profit After Tax ("PAT") for the FYE 2021 was RM60.1 million, an increase of 12.0% over the previous year's PAT of RM53.7 million.

For the FYE 2021, basic earnings per share ("EPS") were computed at 7.50 sen, compared to 7.24 sen in the previous year.

REVIEW OF FINANCIAL PERFORMANCE AND POSITION (Cont'd)

On 19 April 2021, the Company completed the acquisition of 99% equity interest in MiMTW, with the purchase consideration of RM311.85 million being settled through the issuance of 74,250,000 new ordinary shares calculated at a share price of RM4.20. On 31 May 2021, the remaining 1% was purchased for RM2.85 million in cash.

The Company had on 5 August 2021, via our wholly owned subsidiary, Suzhou Mi Equipment Co. Ltd., entered into a capital increase agreement with Talentek Microelectronics (Hefei) Limited ("Talentek"), Lansus Technologies Inc. and Wuhan Silicon Integrated Co. Ltd., to subscribe for the increase in capital of Talentek amounting to RMB45 million (equivalent to RM29.15 million or 22.64% equity interest in Talentek) via cash consideration. On 8 October 2021, the proposed subscription had been completed and Talentek is now an associate company of our Group.

On 24 August 2021, we completed a private placement exercise with the listing of and quotation for 75,750,000 Placement Shares, which represent 9.23% of the total number of issued shares of the Company (excluding treasury shares) on the Main Market of Bursa Malaysia Securities Berhad ("Bursa"). The exercise raised RM295.4 million gross proceeds for the Group which would be used for business expansion, working capital requirements, and repayment of bank borrowings.

Borrowings increased over the year, owing to the Group's expansion and capital expenditure. At a total borrowing of RM108.4 million, however, the debt-to-equity ratio of 0.11 remained low on the back of the enlarged total shareholders' equity.

Our Group's cash and bank balances at RM394.6 million at financial year-end remain very healthy, thanks to funds from the private placement exercise, the drawdown of further borrowings, and higher net cash from operating activities for the financial year under review. The quick ratio was recorded at a robust level of 5.1, an increase from the previous year's level of 4.7.

Our Group's net asset per share increased to RM1.25 per share from RM0.52 per share the previous year, thanks to increased shareholder equity as a result of enlarged share capital, acquisitions, operations, and expansions.

BUSINESS & OPERATING ACTIVITIES OVERVIEW

Our Group operates mainly through two business units, namely SEBU and SMBU.

BUSINESS & OPERATING ACTIVITIES OVERVIEW (Cont'd)

Semiconductor Equipment Business Unit ("SEBU") (Cont'd)

SEBU designs and develops in-house brand series using its engineering and technical capabilities, spanning across Malaysia, Taiwan, Korea and China as follows:

Country	Products	Target Market Segment
Malaysia (Penang)	Mi Series (Assembly and Packaging Equipment) Advanced Packaging (WLP, WLCSP, FOWLP, Flip Chip) die sorting tape and reel machine with vision inspection	<ul style="list-style-type: none"> • Telecommunications industry (5G market) for smartphones, tablets, and wireless wearable devices • IoT industry Bluetooth, near field sensing, sensor applications which require high functionality, mobility and low power consumption in small form factor
Taiwan (Hsinchu)	Vi Series (Vision Inspection Equipment) Wafer and package inspection both in 2D and 3D mode	<ul style="list-style-type: none"> • Telecommunications industry (5G market) for smartphones, tablets, and wireless wearable devices • IoT industry which requires high functionality, mobility and low power consumption in small form factor

The Mi Series, Wafer Level Chip Scale Packaging ("WLCSP") die sorting machine, particularly the Mi40 model, continues to drive our Group's revenue for year 2021 and remains the Group's flagship product. WLCSP is one of the most advanced packaging technologies used in the semiconductor industry due to its strength in performance and cost advantages. It has been widely used in smartphones, tablets, and other applications that require high functionality, mobility and low power consumption in a small form factor. The Mi40 model, released in year 2019, remains well-liked by customers due to its high speed and characteristics. The increased processing efficiency enables it to meet the ever-increasing needs of the semiconductor manufacturing and packaging industry.

The Mi Quantum die sorter machine, which is the next generation following the Mi40 series, was also recently unveiled by the Group in the SEMICON exhibition held in Taiwan during December 2021. It is regarded as one of the industry's quickest wafer-level die sorter machines.

The previous Automation and Robotic Business Unit ("ARBU"), which has been merged into Mi Equipment Malaysia forming the Smart Factory Automation ("SFA") department, has continued to assist and complement the equipment business, particularly the Mi Series. The factory automation and robotics systems, as well as the software with artificial intelligence ("AI") content, which are employed in a number of businesses that are adopting Industry 4.0 technology, were frequently paired as part of the Mi Series' equipment sale package for customers.

Aside from the Mi Series, the Group had also introduced new Vi Series models to capitalise on opportunities in the silicon defects inspection process from high-end flip chips, SiP, and 2.5D packages. Further, we materialized our maiden sale of laser-assisted bonding ("LAB") machine after the 2-year hard work in new product development which testify our success penetration in high performance chip segment, not to mention the pilot sale of test handler to our associated company, Talentek.

We will continue to develop and release new products under our SEBU and at the same time adopt aggressive sales and marketing strategies to sell and market these products, expand the market share and strengthen customer relationships.

CEO'S STATEMENT AND MANAGEMENT DISCUSSION & ANALYSIS (Cont'd)

BUSINESS & OPERATING ACTIVITIES OVERVIEW (Cont'd)

Semiconductor Material Business Unit ("SMBU")

With the acquisition of MiMTW in April 2021, we have established ourselves as the first and only semiconductor technology player in Malaysia with interests in both equipment and materials businesses. Our Group is now able to deliver to the customer one-stop solutions for both equipment and materials, which give the Group its differentiation and competitive edge.

In addition to being synergistic, SMBU aids the Group in mitigating the cyclical nature of the semiconductor equipment business. The product portfolio of both semiconductor equipment and material business units can also be cross-sell to key strategic customers of both, delivering entire solutions to customers for not just better cost structure, but also technology developments and innovations.

SMBU is principally involved in the manufacturing and sale of solder spheres ("solder balls"), which are crucial components to electrically interconnect flip chip semiconductors and widely used in advanced packaging such as ball grid array and wafer level packaging in the semiconductor industry. SMBU's business footprint is as follows:

Country	Products	Target Market Segment
Taiwan (Tainan)	Manufacturing and Sales Solder Spheres (solder balls)	<ul style="list-style-type: none"> Advanced packaging such as WLP, WLCSP, FOWL, BGA, and Flip chip BGA
China (Ningbo)	Manufacturing and Sales Solder Spheres (solder balls)	<ul style="list-style-type: none"> Advanced packaging such as WLP, WLCSP, FOWL, BGA, and Flip chip BGA
Singapore	Sales Solder Spheres (solder balls) Process Chemical	<ul style="list-style-type: none"> Advanced packaging such as WLP, WLCSP, FOWL, BGA, and Flip chip BGA Wafer Bumping Process

SMBU saw constant demand globally. Apart from its existing manufacturing site in Tainan, SMBU's Ningbo factory in China is targeted to start commercial operations in second half of 2022. With both manufacturing sites in operations, SMBU is expected to continue to grow at a rapid pace in the foreseeable future.

Engineering and Research Development Centres

In semiconductor industry, continuous efforts and investment in research and development ("R&D") are vital for business sustainability. To that purpose, the Group has developed engineering centres both locally and internationally to conduct R&D and other product development projects for the Group, particularly for SEBU.

The Group's overseas engineering centers are in Taiwan, Korea and China. Each engineering centre concentrates on R&D programmes tailored to certain product areas. The vision inspection equipment is the focus of the Hsinchu Engineering Centre in Taiwan, the die bonding equipment is the focus of the original Suwon Engineering Centre in Korea (now relocated to Pyeongtaek City), and the final test equipment is the focus of the Suzhou Engineering Centre in China. The Penang Engineering Centre continues to focus on the R&D of high technology sorting and taping equipment. These engineering centres in their respective nations also carry out manufacturing activities to enjoy the benefits of being able to stay near to their customers and further explore prospective technical collaborations.

The Group's R&D expenses in year 2021 was RM4.5 million (FYE 2020: RM4.0 million). As of 31 December 2021, combining both SEBU and SMBU total number of patents, the Group have successfully registered 27 patents, bringing the Group's total number of registered patents to 39, with another 26 pending.

CEO'S STATEMENT AND MANAGEMENT DISCUSSION & ANALYSIS (Cont'd)

BUSINESS & OPERATING ACTIVITIES OVERVIEW (Cont'd)

Management of Sustainability, Risk Management, and Governance Matters

We recognise that changes in the global economy, outbreaks of war, trade disputes, unexpected global or regional political developments, acceleration of technological change, higher-than-expected inflation causing changes in consumer behaviour towards buying electronic and technological gadgets, currency and interest rate volatility, global inventory adjustments, regulatory changes in the countries in which it operates and uncertainties posed by pandemic, are all factors that will have an impact on the Group's business including the areas of supply chain and logistics.

Currently, we managed these risks through our agile business models, multi-national operations bases, proactive forecasting and planning, aggressive marketing and sales strategies, business additions plans, expanding product ranges, diversified customer base and markets, and continuous efforts in research and development. In terms of risk management for new business ventures, we had been cautious not to enter any new business without proper planning and extensive due diligence.

Furthermore, we believe that staying focus on accomplishing the goals in our 10-year master blueprint, including mid-term goals and targets, will help us better manage these risks and ensure long-term sustainability for the Group.

On top of the above, the management of sustainability risks and opportunities for our Group is further guided by a materiality process which is in line with the sustainability disclosure requirements of the Main Market Listing Requirements of Bursa. Efforts and resources are prioritised for the management of matters which are material to the Group, i.e. the material sustainability matters. This process is further supported by the Group's risk management and internal control systems which is built upon the Group's Enterprise Risk Management ("ERM") Framework. The performance of the Group's management of material sustainability matters is discussed under Sustainability Statement in this Annual Report as well as our inaugural Sustainability Report.

Setting the foundation of a business environment with good corporate governance and ethics is as crucial as proper and diligent business management. We ensure compliance with applicable laws and regulations and create an ethical working environment through the Group's governance framework, the Code of Conduct for Directors, the Code of Conduct for Management and Employees, and the Supplier Code of Conduct which have incorporated, amongst others, the latest amendments to the Malaysian Anti-Corruption Commission Act 2009 and the Guidelines on Conduct of Directors of Listed Corporations and their Subsidiaries.

OUTLOOK AND PROSPECTS

Though our Group is already one of the country's largest semiconductor industry players, particularly in the semiconductor manufacturing backend processes covering both equipment and material segments, we have remained committed to our goal of aspiring to be a multi-national diversified semiconductor solutions provider, rather than just another local Automated Test Equipment manufacturer.

To that aim, our Group is sticking to our 10-year master blueprint, which began in year 2019 to realise our goals and ensure our business sustainability. We have formulated our corporate strategies and plans for execution in every year, every 2.5 years, every 5 years, and every 10 years in our 10-year master blueprint, coupling with the business roadmaps for the respective business units.

The contribution of SEBU, which produces various types of equipment for important markets such as Taiwan, South Korea, and China, amongst others, is expected to expand, not only as demand in these markets grows, but also as new product releases are introduced into these markets. As for SMBU, it has its own patented technology and capability in designing unique metallurgy solutions enabling improved yield and reliability to customers as well as having in-house built equipment to produce solder spheres, which are widely utilised in advanced packaging in the semiconductor industry.

CEO'S STATEMENT AND MANAGEMENT DISCUSSION & ANALYSIS (Cont'd)

OUTLOOK AND PROSPECTS (Cont'd)

While we now operate two main business units through the SEBU and SMBU, accomplishing our aim to build an integrated equipment and material supplier in semiconductor industry in our first 5-years roadmap, we plan to expand to become a semiconductor and commercial solutions provider in our second 5-years roadmap through the setting up of the third and fourth business units, to complete our journey set under the 10-years blueprint. This will enable the Group to provide end-to-end solutions and to be a market leader in semiconductor technology innovation.

For the upcoming third business unit, we will be looking at businesses related to high-tech advanced packaging and development, advanced solutions and services, as well as specific semiconductor manufacturing processes. We believe that with our expertise in the existing equipment and materials businesses, the Group should be able to develop new advanced packaging technology. Instead of being a market follower, the Group aims to introduce a game-changing product to the market through this third business unit.

On the potential fourth business unit, we will be looking at commercial electronic products for the mass market, albeit ones with high-technology content. We anticipate that the market for household items with additional technology features and aspects, such as microwave ovens, air conditioners, fans, kettles, and washing machines, will rise in the coming years. The Group aspires to be prepared for this shift in market dynamics.

The Group is also on the lookout for accretive acquisitions that will provide synergistic value to its existing business pillars. In the short term, however, as we continue to invest and expand aggressively in order to increase revenue and market share, a lower profit margin can be expected until the returns on investments materialise. We anticipate that with potential earnings-accretive acquisitions, new equipment release and expanded product portfolio as well as larger customer base will enable us to achieve long-term growth and business sustainability.

While the Group will be driven by our roadmap and master blueprint, we are bearing in mind that the prospects for the Group will also be influenced by the demands in the global semiconductor industry which is indicated by the level of capital spending in the sector. Higher level of capital spending is essential across the entire semiconductor value chain to meet the demand for semiconductors from all sectors of the economy.

In this regard, recent indications showed that, despite disruptions caused by geopolitical circumstances and the pandemic, capital spending has remained robust. The semiconductor industry is expected to expand rapidly in the near future, owing to the adoption of 5G and innovation of the metaverse which will drive smartphone demand, continued cloud infrastructure expansion, machine learning and other cutting-edge technologies development, and the impending growth of electric vehicles.

The bright prospects for the global semiconductor industry augurs well for our Group and businesses. In line with our master blueprint and roadmap, our strategy of being a complete, multinational, end-to-end semiconductor player, driven by continuous and intensive research and development, while always looking for acquisition opportunities, will position our Group well to capture opportunities and expand our market share. It is our commitment to all our stakeholders, to making a difference relentlessly and over the long-term.

OUR RESPONSE TO COVID-19

In 2021, the pro-longed COVID-19 pandemic continuously caused major impact across the world and significantly affected the health, economic, environmental and social domains. We worked relentlessly to help prevent the spread of the virus, while safeguarding the health and safety of our employees, subcontractors, and suppliers during the pandemic.

Technology Transformation: In-house Developed System

Company-wide health and safety practices are developed and implemented to curb COVID-19 infections within the workplace. Engeye Smart Gate System is our in-house developed system applying technology to control the spread of COVID-19 through screening, restraining and diminution. The first prototype invention started in February 2020 at Mi Equipment (M) Sdn. Bhd. (operating site in Penang, Malaysia), replacing human to carry out contactless temperature scanning for employees, visitors, and customers.

Engeye Smart Gate System

This has reduced the potential risk of contact by having administrative staff to conduct the daily temperature scanning. The smart gate system installed with Artificial Intelligence (“AI”) technology and facial recognition is able to identify our employees, thus contact tracing is made easy with logs of entry times and temperature readings. The Engeye Smart Gate System is also equipped with capability to detect if user is wearing the face masks properly and elevated body temperatures, prevent potentially compromised individual from entering the building.

Keep Everyone Safe

Businesses and employers can play a key role in preventing and slowing down the spread of COVID-19 within the workplace. It is important for company to keep its people safe while maintaining the business running. Various prevention and control measures were implemented:

- Keep up to date with the latest development, information and the relevant directive of COVID-19 to ensure that employees would react and perform correctly and ensure strict compliance at the workplace.
- Provide personal protective equipment, such as face masks, face shields and gloves to employees.
- All visitors are required to register and obtain approval before entering to company.
- Disinfection stations were allocated in accessible way and within sight at each floor to ensure easy access by employees to keep their workstations clean and hygiene.
- Sanitization on high-touch surfaces.
- Encourage alternative communication platforms and meeting methods (such as virtual meetings, teleconferencing solutions) to reduce in-person interaction.
- Segregate sitting arrangement in meeting room, pantry and etc.
- Avoid unnecessary travel unless for urgent business purposes.
- Apply staggered work schedule and remote work where applicable.

OUR RESPONSE TO COVID-19 (Cont'd)

COVID-19 Vaccination

We encourage our employees to be vaccinated although there are no regulations and mandatory vaccination schemes by the local authority for the general public. Majority of our employees registered for vaccination according to the guideline provided by the Ministry of Health. One of the Group's subsidiary, namely Mi Equipment (M) Sdn. Bhd., participated in the Public-Private Partnership COVID-19 Industry Immunization Program ("PIKAS") to accelerate immunization of our employees and subcontractors.

In line with the efforts to reduce the number of COVID-19 workplace clusters and to protect the well-being of employees, the Company encourage our employees to get the booster shot in order to strengthen the protection against infection with COVID-19.

Chart below depicted the vaccination rate of the employees within the Group as of 31 December 2021:

There is still a minority group of employees who have yet to vaccinate due to personal reasons. To clear their vaccine hesitancy, sharing of information on how vaccines work, and their safety profile is conducted regularly to encourage the minority to get vaccinated.

Together We Care

With the number of COVID-19 cases growing exponentially, we are to play our role in combating the disease by adopting public health measures with strict compliance to protect our employees and the community. Continued vigilance is required – "Together We Care".

2021 EVENT HIGHLIGHT

Amid the pro-longed COVID-19 pandemic, company events carried out in 2021 were mostly in-house activities for employees with health precautions and strict compliance with covid prevention protocols, while social events involving community were limited.

STATEMENT ON RISK MANAGEMENT AND INTERNAL CONTROL (Cont'd)

RISK MANAGEMENT (Cont'd)

Based on the established ERM Framework which is responsive to changes in the business environment, the Board and Management have regularly reviewed the risk profiles and key processes for FYE 2021. They evaluate the possibility of emerging risks likely to happen in the future as well as their potential impact on financial and non-financial parameters. Throughout the process, underlying risks related to the key processes and controls thereof were reassessed and additional controls were deployed to mitigate or reduce the risk impact.

The Board believes that there is a sound system of risk management and internal control in place to support the delivery of the Group's strategy, managing the significant risks and taking necessary actions promptly to remedy any significant failings or weaknesses.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MI TECHNOVATION BERHAD

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Mi Technovation Berhad, which comprise the statements of financial position as at 31 December 2021 of the Group and of the Company, and the statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Group and of the Company for the financial year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages 64 to 143.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Group and of the Company as at 31 December 2021, and of their financial performance and their cash flows for the financial year then ended in accordance with Malaysian Financial Reporting Standards ('MFRSs'), International Financial Reporting Standards ('IFRSs') and the requirements of the Companies Act 2016 in Malaysia.

Basis for Opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing ('ISAs'). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence and Other Ethical Responsibilities

We are independent of the Group and of the Company in accordance with the *By-Laws (on Professional Ethics, Conduct and Practice)* of the Malaysian Institute of Accountants ('By-Laws') and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* ('IESBA Code'), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the Group and of the Company for the current year. These matters were addressed in the context of our audit of the financial statements of the Group and of the Company as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

(a) *Determination of fair value of identifiable assets acquired and liabilities assumed on the acquisition of Accurus Scientific Co., Ltd. ("MiMTW")*

As disclosed in Note 8 to the financial statements, the Group acquired MiMTW in April 2021 for a purchase consideration of RM311,850,000. As part of the purchase price allocation performed by management, this amount has been allocated to the fair value of identifiable assets acquired and liabilities assumed, resulting in the recognition of total goodwill amounting to RM118,699,242.

We determined the fair value of the identifiable assets acquired and liabilities assumed, including the intangible assets identified, on the business combination to be a key audit matter as the purchase price allocation requires significant judgement, estimations and assumptions applied by management. Changes in these assumptions may have a material impact on the fair values.

- (iii) Verified the calculation of the purchase price allocation and goodwill on consolidation arising from the acquisition, being the difference between the total net consideration paid and the fair value of the net assets acquired.

(b) *Impairment of trade receivables*

As at 31 December 2021, the carrying amount of trade receivables of the Group amounted to RM144,554,606, which were net of impairment losses of RM967,304. The details of trade receivables have been disclosed in Note 12 to the financial statements.

We determined this to be key audit matter because it requires management to exercise significant judgement in determining the probability of default by trade receivables and appropriate forward-looking information to assess expected credit losses.

Audit response

Our audit procedures included the following:

- (i) Recomputed the probability of default using historical data and forward-looking information adjustment applied by the Group;
- (ii) Recomputed the correlation coefficient between the macroeconomic indicators used by the Group and historical losses to determine the appropriateness of the forward-looking information used by the Group; and
- (iii) Inquiries of management to assess the rationale underlying the relationship between the forward-looking information and expected credit losses.

(c) *Valuation of inventories*

As at 31 December 2021, the Group had inventories amounted to RM110,413,156. The details of inventories have been disclosed in the Note 15 to the financial statements.

We determined this to be key audit matter because it requires management to exercise significant judgement in identifying inventories with net realisable values that are lower than their costs and obsolescence, with reference to the condition of the inventories, as well as the ageing of inventories to ascertain the amount of inventories written down.

Key Audit Matters (cont'd)

(c) *Valuation of inventories (cont'd)*

Audit response

Our audit procedures included the following:

- (i) Obtained an understanding of the procedures in relation to the assessment by the management on the identification and write down of slow moving and obsolete inventories;
- (ii) Tested the reliability of the ageing report of inventories provided by management on sampling basis; and
- (iii) Tested samples of inventories items to ensure they were held at the lower of cost and net realisable value by testing the selling prices of inventories sold from sales invoices subsequent to the end of the reporting period.

We have determined that there are no key audit matters to communicate in our report in respect of the audit of the financial statements of the Company.

Information Other than the Financial Statements and Auditors' Report Thereon

The Directors of the Company are responsible for the other information. The other information comprises the information included in the annual report, but does not include the financial statements of the Group and of the Company and our auditors' report thereon.

Our opinion on the financial statements of the Group and of the Company does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Group and of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The Directors of the Company are responsible for the preparation of financial statements of the Group and of the Company that give a true and fair view in accordance with MFRSs, IFRSs, and the requirements of Companies Act 2016 in Malaysia. The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements of the Group and of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Group and of the Company, the Directors are responsible for assessing the ability of the Group and of the Company to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Company or to cease operations, or have no realistic alternative but to do so.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MI TECHNOVATION BERHAD

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- (a) Identify and assess the risks of material misstatement of the financial statements of the Group and of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Group and of the Company.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- (d) Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and of the Company to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Company to cease to continue as a going concern.
- (e) Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Company, including the disclosures, and whether the financial statements of the Group and of the Company represent the underlying transactions and events in a manner that achieves fair presentation.
- (f) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial statements of the Group. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the financial statements of the Group and of the Company for the current year and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

NOTES TO THE FINANCIAL STATEMENTS

31 DECEMBER 2021 (Cont'd)

10. GOODWILL ON CONSOLIDATION [2021 ONLY] (Cont'd)

(c) Impairment tests for goodwill with indefinite useful live (Cont'd)

Goodwill is tested for impairment by comparing the carrying amounts with the recoverable amounts of the CGUs. The recoverable amount of a CGU is determined based on value in use calculations using cash flow projections from the financial budgets and forecasts approved by management covering a period of five (5) years. Cash flows beyond the five (5)-year period are extrapolated assuming zero growth rates.

Key assumptions used in the value in use calculations are as follows:

- (i) the pre-tax discount rates which are the weighted average cost of capital adjusted for specific risks relating to relevant segments. The average discount rates used is 13%;
- (ii) the growth rate of the revenue are determined based on the industry trends and past performances of the CGU; and
- (iii) the exchange rate used to translate foreign currencies transactions into the other segment's functional currency is based on the exchange rates obtained immediately before the forecast year. Values assigned are consistent with external sources of information.

Based on the annual impairment testing undertaken by the Group, no impairment loss was required for the carrying amount of goodwill assessed as at 31 December 2021 as its recoverable amount was in excess of its carrying amount. Management believes that there is no reasonably possible change in the key assumptions on which management has based its determination of the CGU's recoverable amount, which would cause the CGU's carrying amount to materially exceed its recoverable amount.

(d) The currency exposure profile of trade and other receivables (excluding prepayments) are as follows:

	Group		Company	
	2021 RM	2020 RM	2021 RM	2020 RM
Ringgit Malaysia	1,903,767	1,340,499	31,406,703	15,631,524

	151,244,695	101,955,564	59,660,621	21,885,263

(e) Impairment for trade receivables that do not contain a significant financing component are recognised based on the simplified approach using the lifetime expected credit losses.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of the asset, while 12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within the twelve (12) months after the reporting date. The maximum period considered when estimating expected credit losses is the maximum contractual period over which the Group and the Company are exposed to credit risk.

The Group considers credit loss experience and observable data such as current changes and future forecasts in economic conditions by geographical segment of the Group to estimate the amount of expected impairment loss. The methodology (roll rate method) and assumptions including any forecasts of future economic conditions are reviewed regularly.

During this process, the probability of non-payment by the trade receivables is adjusted by forward-looking information such as gross domestic product (GDP), inflation rate, consumer price index and United State Dollar foreign exchange rate for the financial years ended 31 December 2021 and 31 December 2020 and multiplied by the amount of the expected loss arising from default to determine the lifetime expected credit loss for the trade receivables. For trade receivables, which are reported net, such impairments are recorded in a separate impairment account with the loss being recognised in the statements of profit or loss and other comprehensive income. On confirmation that the trade receivable would not be collectable, the gross carrying amount of the asset would be written off against the associated impairment.

It requires management to exercise significant judgement in determining the probability of default by trade receivables and appropriate forward-looking information.

As at 31 December	967,304	320,933

- (g) For other receivables, non-trade portion of amounts owing by subsidiaries and lease receivable, the Group and the Company apply general approach to measure expected credit losses, which include a three (3)-stage impairment model based on changes in credit quality since initial recognition. The Group and the Company assess whether credit risk has increased significantly since initial recognition by comparing the risk of a default as at the end of the financial year with the risk of a default as at the date of such receivables are initially recognised. In determining whether credit risk on a receivable has increased significantly since initial recognition, the Group and the Company observe the latest financial position and default of payments by the receivables.

The Group defined significant increase in credit risk based on operating performance of the receivables, changes in contractual terms, payment trends and past due information. The Group considers trade receivables to be in default when there is no reasonable expectation of recovery.

The Group considers other receivables to be in default when the receivables are past due more than twelve (12) months.

The Group and the Company assess impairment loss on other receivables and non-trade portion of amounts owing by subsidiaries based on twelve (12)-month expected credit loss approach and lifetime expected credit loss approach respectively. No expected credit loss is recognised as it is negligible.

- (h) Information on financial risks of trade and other receivables is disclosed in Note 38 to the financial statements.

14. DEFINED BENEFIT PLANS [2021 ONLY] (Cont'd)

- (a) The Group operates funded defined benefit plans for its eligible employees of which the assets are held in separately administered trusts. Under this plan, the entitlement of eligible employees are based on the units of service years and the average salaries in the last month of the service year.

The Group provides retirement benefit obligations for qualifying employees of its overseas subsidiaries, MiMTW and MiEKR, in accordance with the legislations established in Taiwan (Republic of China) and Republic of South Korea.

- (b) Amounts recognised in the statements of financial position are determined as follows:

	Group 2021 RM
Present value of funded defined benefit obligations	(3,446,465)

14. DEFINED BENEFIT PLANS [2021 ONLY] (Cont'd)

(e) Sensitivity analysis

Reasonably possible changes at the end of reporting period to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the retirement benefit obligation by the amount shown below:

	Group 2021 RM
Discount rate	
- if increase by 0.5% to 1%	(466,220)
- if decrease by 0.5% to 1%	<u>552,755</u>
 Expected rate of salary	
- if increase by 0.5% to 1%	550,464
- if decrease by 0.5% to 1%	<u>(466,414)</u>

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligations as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

38. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The financial risk management objective of the Group is to optimise value creation for shareholders whilst minimising the potential adverse impact arising from fluctuations in foreign currency exchange and interest rates and the unpredictability of the financial markets.

The Group operates within an established risk management framework and clearly defined guidelines that are regularly reviewed by the Board of Directors and does not trade in derivative financial instruments. Financial risk management is carried out through internal control systems, insurance programmes and adherence to the Group financial risk management policies. The Group is exposed mainly to credit risk, liquidity and cash flow risk, foreign currency risk, interest rate risk and market risk. Information on the management of the related exposures is detailed below.

(a) Credit risk

Exposure to credit risk arises mainly from sales made on credit terms, short term funds and deposits with licensed banks, which requires the loss to be recognised if a counter party fails to perform as contracted. The Group controls the credit risk on sales by ensuring that its customers have sound financial position and credit history. The Group also seeks to invest cash assets safely and profitably with approved financial institutions in line with the policy of the Group.

(b) Liquidity and cash flow risk

The exposure of the Group to liquidity and cash flow risk arises primarily from the mismatch of the maturities of financial assets and liabilities. The Group actively manages its debt maturity profile, operating cash flows and availability of funding so as to ensure that all operating, investing and financing needs are met. In executing its liquidity risk management strategy, the Group measures and forecasts its cash commitments and maintains a level of cash and cash equivalents deemed adequate to finance the activities of the Group.

The Group practises prudent liquidity risk management to minimise the mismatch of financial assets and liabilities whilst maintaining sufficient cash and the availability of funding through standby credit facilities.

The table below summarises the maturity profile of the liabilities of the Group and of the Company at the end of the reporting period based on contractual undiscounted repayment obligations.

The currency giving rise to this risk is primarily in United States Dollar ('USD'), Taiwan Dollar ('TWD') and Chinese Yuan ('CNY').

38. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (Cont'd)

(d) Interest rate risk (Cont'd)

The Group and the Company do not account for any fixed rate financial instruments at fair value through profit or loss, and the carrying amount of fixed rate financial instruments of the Group and of the Company are measured at amortised cost. Therefore, no sensitivity analysis for fixed rate instruments was prepared as the change in market interest rate at the end of the reporting period would not affect profit or loss.

(e) Market risk

Market risk is the risk that the fair value or future cash flows of the financial instruments of the Group and of the Company would fluctuate because of changes in quoted prices (other than interest or exchange rates).

The Group and the Company are exposed to market risk primarily arising from placements in bond funds held by the Group and by the Company as at the end of reporting period. They were held mainly to manage free cash flows and optimise working capital rather than for trading purposes. These instruments are classified as financial assets designated at fair value through profit or loss.

To manage its price risk arising from placements in bond funds, the Group and the Company diversify its portfolios in accordance with the limits set by the Group.

The following table demonstrates the sensitivity analysis of the profit after tax of the Group and of the Company if the Net Asset Value ('NAV') had been one percent (1%) higher or lower arising as a result of higher or lower fair value gains on bond funds designated at fair value through profit or loss, with all other variables held constant:

40. SIGNIFICANT EVENTS SUBSEQUENT TO THE END OF REPORTING PERIOD

- (a) On 4 January 2022 and 22 February 2022, the Company granted 600,000 ordinary shares and 1,000,000 ordinary share respectively under SGS to eligible employees of the Group, of which none have been vested. The grant will vest for a period of 4 years respectively.

As at the date of authorisation of the financial statements, the Russia-Ukraine conflict is still evolving and remains unpredictable. Consequently, the Group and the Company are unable to estimate the financial effects of the situation at this juncture. The Group and the Company are actively monitoring and managing the operations of the Group and the Company to minimise any impact arising from these developments.

41. COMPARATIVE INFORMATION

During the financial year, the Group and the Company changed its analysis of expenses recognised in profit or loss from classification based on function to classification based on nature as it can provide more reliable and relevant information to users of financial statements upon change in composition of its reportable operating segments. Explanatory Note On Special Business

i) Authority to Issue Shares (Resolution 7)

The proposed resolution is in relation to authority to allot shares pursuant to Section 75 of the Act, and if passed, will give a renewed mandate to the Board, from the date of above AGM, authority to issue and allot shares in the Company up to and not exceeding in total ten per centum (10%) of the issued share capital of the Company for the time being, for such purposes as the Directors consider would be in the interest of the Company (“General Mandate”). This General Mandate, unless revoked or varied at a general meeting of the Company, will expire at the conclusion of the next AGM of the Company or the period within which the next AGM of the Company is required by law to be held whichever is the earlier.

At this juncture, there is no decision to issue new shares. However, should the need arise to issue new shares the General Mandate would avoid any delay and costs in convening a general meeting of the Company to specifically approve such issue of share. If there should be a decision to issue new shares after the General Mandate is obtained, the Company would make an announcement in respect of the purpose and utilization of the proceeds arising from such issue.

ii) Proposed Renewal of Share Buy-Back (Resolution 8)

The proposed resolution, if passed, will provide the mandate for the Company to buy back its own shares up to a limit 5% of the total issued and paid-up share capital of the Company. The explanatory notes on Resolution 8 are set out in Statement dated 29 April 2022.
